**SPECIAL SCREENING**

**an inconvenient truth**  
A GLOBAL WARNING

From director Davis Guggenheim comes the Sundance Film Festival hit, **AN INCONVENIENT TRUTH**, which offers a passionate and inspirational look at one man's fervent crusade to halt global warming's deadly progress in its tracks by exposing the myths and misconceptions that surround it. That man is former Vice President Al Gore, who re-set the course of his life to focus on a last-ditch, all-out effort to help save the planet from irrevocable change.

**Steve Brine** says; *"This is a landmark film, it is one of the most important things I have seen in many years. We are putting on this special screening to give more people the chance to hear what it has to say. I believe climate change is one of the most important issues facing our world today; if we all pull together the outcome is not inevitable, we can make a difference and we can all play a part in turning things around."*
